1. Claims 1,14 and 26 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is unclear from the specification where a predetermined value is from and how this value is obtained and how this predetermined value is related and associated with the first and second values from the first and second samples.

Furthermore, if two different samples are scanned and these scanned data are collected and compared against each other, how can one determined which sample is a real defect one since either of their good quality is uncertainly unknown. Therefore, it appears that it is impossible to determined the defects of the sample from the specification.

2. Since claims are indefinite, no art has been applied to these instant claims.

3. Applicant's arguments with respect to claims 1,14 and 26 have been considered but are moot in view of the new ground(s) of rejection.
